About

20 Years of Experience | Typescript, JavaScript, Node.js, React, Vue, PHP, Linux, Etc…

Contact: LinkedIn | levhita [at] gmail.com

I'm a seasoned Full Stack Web Developer with a passion for crafting innovative and user-friendly digital solutions. Throughout my 20 years in the industry I have worked with most web stacks and their related technologies .

Successfully delivered numerous end-to-end web applications , employing my knowledge in both frontend and backend development. I excel at creating dynamic and responsive user interfaces using JavaScript frameworks like React and Vue (along with their server side counterparts Next and Nuxt).

Started working with the dawn of the dynamic web, I have seen everything come and pass , from the days where you had to write your own PHP frameworks and there was no AJAX, to our current days where JS actually has parallel processing and is surprisingly good for dealing with large quantities of streamed data.

Worked with: Full Stack Development, Javascript, PHP, Linux, Typescript, Node.js, Express.js, React.js, NextJs, Vue.js, Nuxt, Shell Scripting, Servers, PM2, Jest, LAMP, CSS, MySQL, MongoDB, PostgreSQL, SQLite, SOAP, CodeIgniter, Zend Framework, Yii, GO, Python, Schema, YAML, GIT, Apache, NGINX, NGROK, Wordpress, BackboneJs, Handlebars, Smarty, Redis, Unit Testing, Backend, Frontend, Automation, Microservices, Docker, EC2, AWS, Certified Scrum Master, Agile Metodologies, MVC, Product Development, Customer Service, Software Architecture, Database Design, GPG, CMMI, PHP-GTK, etc…

Main Experience

Sr. Web Solutions Engineer
Incode Technologies

Aug 2023 - Present

Solutions Enginneer in charge of helping customers to properly integrate with Incode's platform, constantly running deep dives into the different client's code bases and solving any issue that might impact their integrations security, performance, conversion or fraud metrics
